Level 3: Component diagram

Next you can zoom in and decompose each container further to identify the major structural building blocks and their interactions.

The Component diagram shows how a container is made up of a number of "components", what each of those components are, their responsibilities and the technology/implementation details.

Scope: A single container.

Primary elements: Components within the container in scope. **Supporting elements:** Containers (within the software system in scope) plus people and software systems directly connected to the components.

Intended audience: Software architects and developers.
